Curtis J. Woods
SOFTWARE ENGINEER

CurtisJWoodsII@gmail.com | Pittsburgh, PA | 724-777-8479 | LinkedIn | GitHub | Portfolio

An artist and software engineer, always moving forward to the next challenge, dedicated to growth and making your team cheerful, productive, and prosperous

SKILLS
Proficient: HTML, CSS, JavaScript, Next.js, Express, React, React Native, Nodejs, MongoDB, Linux, Git
Familiar: Python, PostgreSQL, SQL

EXPERIENCE
General Assembly   **April 2020 - July 2020**
Software Engineering Fellowship
- Developed several applications alone and as a team using the MERN stack, RESTful APIs, Python, etc.
- Practiced agile methodologies and participated in daily stand ups, providing helpful feedback on projects
- Studied and implemented modern frameworks like React, Bootstrap, Materialize CSS

Woods Piano Studio   **January 2017 - Present**
Digital Content Creator and Tech Support
- Produce printable games using Photoshop, Scribus, and Inkscape to sell to teachers on TeachersPayTeachers.com, fix technical issues, and help with misc. artwork needs

UPMC for Life   **February 2015 - December 2016**
Benefits Advisor, Medicare Sales
- Licensed for Accident and Health Insurance in PA, OH, MD, GA, guided prospective members on picking the best Medicare plan for themselves and their loved ones, and assisted with training

Ignorant Potatoes   **July 2012 - January 2014**
Owner, 3D Artist and Designer
- Designed 3D and 2D artwork using Photoshop, 3DS Max for clients to be sold, prototyped, or printed

PROJECTS
Piano Studio Student Tracker - Mongo, Express, React (JSX), Node, Heroku
- A simple app for piano studios to manage students,
- I styled the front using Bootstrap and MongoDB for the database

GetHub - Express, React Native, Node, Puppeteer - (Team Project)
- DeveloperWeek Hackathon, three person project designed to search the IMDB API
- I created the RESTful API to pull movie data from the Amazon Prime Videos website

Intonation - Mongo, Express, NextJs, Node - (Personal Project)
- A richer version of my student tracking app, using server side rendering
- Will include a roster, admin editing capabilities, teacher and student roles, and more thorough note and lesson tracking
